

Out of the total number of students that took our poll 82% were male and 18% were female.

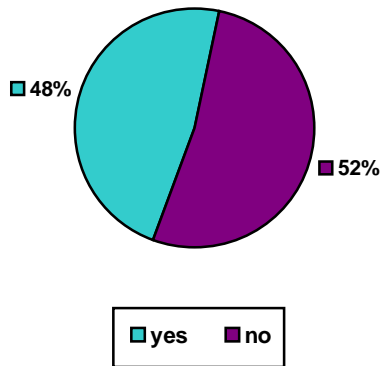

More than $\frac{3}{4}$ of participants are older than 18, but we must take into consideration the fact that getting a driving license is enabled to everyone who turned 17.

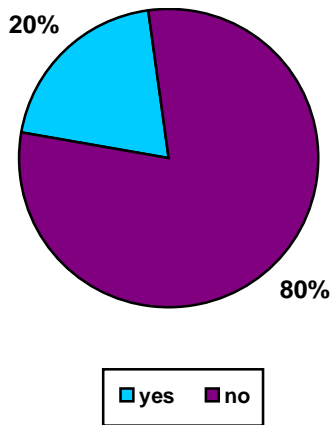

61% of students who took a poll have their license less than 1 year and only 39% have it for longer.

Do you consume alcohol or other psychoactive substances?

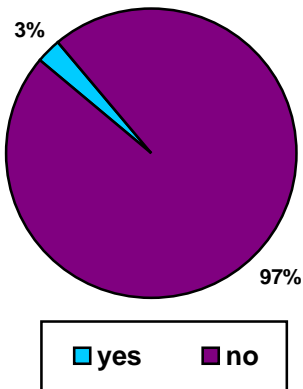

By further analysing, we came to conclusion that the number of students who do consume this substances is almost same as the number of those who don't.

Have you ever driven a vehicle while under influence of alcohol?

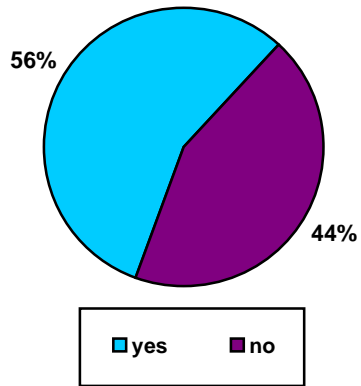

Good thing we found out is the fact that not many students driven under influence of alcohol.

Were you ever punished for driving under influence of alcohol?

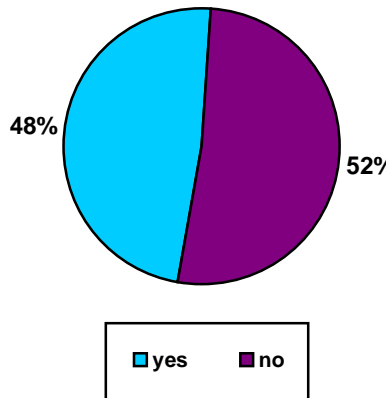

Even though 20% of participants drove under influence of alcohol, only 3% were punished for that.

Do you know someone who took part in traffic accident which was caused by a drunk driver?

The fact that more than half of students know someone who died in traffic accident is no surprise.

Do you think that there is an amount of alcohol after which driving is safe?

Under no circumstances should these students drive a car while under influence of alcohol.
