

SUBTITLES OF THE INTERVIEWS IN THE VIDEO

1 – FIRST WOMAN: This is a nice video. I am also a disabled person, I have a fake leg and as far as I see, in traffic no one cares for the disabled. We have difficulty in getting on the metro buses. Even in shopping centres, people hit us in X-ray.

2- SECOND MAN: The municipalities can't make good roads for the disabled people. Sometimes they can't even find a proper way to get their wheelchairs on because there isn't a road for them.

3 – THIRD WOMAN : There must be a regulation for the disabled. People park their places in the car parks.

Our student: What can be done to improve their standards in traffic?

THIRD WOMAN: There must be even private vehicles for the disabled people. The municipalities must have a law to protect them.
